Introduction to GreenScreen™

April 3, 2012 (Tuesday)

Introduction to GreenScreen™: The GreenScreen™ for Safer Chemicals is a comparative chemical hazard screening method developed by Clean Production Action to help move our society quickly and effectively toward the use of greener and safer chemicals. The GreenScreen™ is used by organizations including Washington State Department of Ecology and Hewlett-Packard to evaluate the hazards associated with specific chemicals and identify safer alternatives.

2 ET Presenter: Shari Franjevic (Cleaner Production Action)
