**Company:** Ecology and Environment, Inc  
**Location:** Pittsburgh, PA

**Job Description:** Ecology and Environment, Inc. is a fully integrated environmental consulting firm committed to supporting sustainable development through responsible environmental stewardship. We are seeking an experienced mid- to senior-level Permitting Project Manager / Civil Engineer for our Pittsburgh, PA office. This position will be responsible for supporting and managing a variety of environmental and energy projects in the northeast and mid-Atlantic regions. Our successful candidate must have a strong understanding of the various policy, permitting, and environmental documentation processes in Pennsylvania for projects including pipelines, transmission, and renewables.

**Responsibilities:**

- Manage a variety of environmental projects for energy clients, including electrical transmission, pipelines, and wind farms, driven by federal and state regulatory processes (i.e., FERC)
- Coordinate and meet with energy project developers and owners/operators to clearly understand client requirements and explore permitting/project scenarios
- Coordinate and negotiate with Federal and State Agencies regarding permit application requirements and proposed permit conditions
- Direct the preparation of permit applications including engineering documents (e.g., ESCPs, SWPPPs) in support of permit applications
- Prepare permitting documents and obtain required local, state, and federal environmental permits including wetlands/404 permits and jurisdictional determinations
- Manage multidisciplinary project teams and prioritize work assignments
- Ensure that project teams work together to achieve results; lead by example and actively identify and resolve issues
- Understand and account for project requirements including scope, budget, schedules, and contract constraints with the appropriate level of deliverable quality
- Lead and contribute to proposal efforts focusing on environmental
permitting for energy clients

Requirements:

- Bachelor's Degree in Civil or Environmental Engineering or closely related technical discipline, E.I.T. certification is preferred; PE certification is a plus
- 10 years of progressive experience including managing/permitting of energy/linear projects in Pennsylvania
- Demonstrated project management capabilities (project teams of 3-30 staff and budgets of $10,000 to $300,000)
- Ability to professionally interact with clients and staff to define/understand project vision/goals and constraints
- Successful client and agency engagement to reach mutually acceptable conditions
- Experience with major federal statutes and implementing regulations including NEPA, CWA, CAA, NHPA, FERC
- Experience with Pennsylvania state and county regulations
- Experience in stormwater management and design including erosion and sedimentation plans
- Experience preparing ESCGP-2 (or equivalent) and other permit documents
- Clear and effective technical writing
- Excellent leadership and interpersonal communication skills
- Strong organizational, analytical, and strategic planning skills with attention to detail and a high quality of work in a pressure environment
- Ability to elicit cooperation from a wide variety of sources, disciplines, and experts including senior management, clients, and other departments
- Ability to travel to support business needs E & E is its people. We are a knowledge based culture with an integrated staff of more than 85 scientific and engineering disciplines—a group of innovators who pave the way in implementing environmental solutions. E & E has been dedicated to environmental conservation and enhancement since our founding in 1970. E & E offers opportunities for growth in a team-oriented environment, with a competitive benefits package. Please view our website at www.ene.com to apply on-line. Must be eligible to work in the United States. Visa sponsorship will not be provided.
